EXECUTIVE MANDATE

Build the operating capability behind growth.

Most effective where technology must become more strategic, disciplined, secure, and scalable - connecting executive priorities to pragmatic execution while maintaining continuity in complex, regulated environments.

- 01

Set direction
Translate company priorities into roadmaps, investment decisions, governance, and measurable outcomes.
- 02

Modernize the core
Advance platforms, digital experiences, infrastructure, and data without disrupting business continuity.
- 03

Reduce enterprise risk
Strengthen identity, access, security controls, resilience, and software governance.
- 04

Create execution discipline
Align engineering, quality, IT operations, vendors, and executive oversight around accountability.

SELECTED EXECUTIVE IMPACT

ENTERPRISE PLATFORMS

Enterprise platforms

Built Medical Answers, a purpose-built DME/HME billing and patient-management platform for the CGM industry, and PrismmedConnect, a secure mobile platform for patient communications and coordinated follow-up.

ENTERPRISE SECURITY

Enterprise security

Advanced Microsoft Entra integration, centralized identity for GitHub and 1Password, strengthened access controls, hardened SFTP encryption, and improved secure software delivery.

AUTOMATION AND INTEGRATION

Automation and integration

Supported the TriZetto-to-Waystar migration and automated claims transmission, modernized reporting workflows, and advanced integration planning to reduce manual order creation.

GOVERNANCE AND OPERATING MODEL

Governance and operating model

Implemented technology intake, prioritization, executive KPIs, repository governance, release visibility, standardized onboarding, and reporting infrastructure.

POST-ACQUISITION INTEGRATION

Post-acquisition integration

Expanded from software leadership into enterprise IT Operations, aligning platforms, infrastructure, cybersecurity, support, vendors, governance, and delivery under a broader mandate.

**Resilience over
hype.
Outcomes over
activity.
People at the
center.**

Technology should simplify operations, empower people, reduce risk, and create measurable business value. The goal is not technology for its own sake; it is a stronger organization that can execute reliably and adapt intelligently.

CAREER CONTEXT

Leadership across transformation cycles and regulated industries.

2026-Present

**Vice President of
Technology | Prism Medical
Products**

Lead Engineering, Delivery and Quality Assurance, and IT Operations. Own enterprise technology strategy, cybersecurity modernization, infrastructure, software platforms, governance, vendor leadership, and executive reporting.

2018-2026

**Technology Leadership and
Solutions Architecture |
Acentus / Prism Medical**

Directed architecture across 10+ portal applications, 10+ APIs, 55+ batch and automation services, and 75+ repositories; automated critical healthcare workflows and led modernization before acquisition.

2006-2024

**Applications Architect | The
Auto Club Group**

Led strategic insurance technology initiatives across application architecture, enterprise delivery, release management, platform modernization, and performance optimization.

Earlier Career

**Citigroup | Kronos |
Microsoft | Independent
Consulting**

Built foundational expertise across global AML risk management, healthcare workforce systems, Microsoft licensing, software engineering, and enterprise platform consulting.

EXECUTIVE PERSPECTIVE

Business outcomes first Technology delivery matters when it improves service, reduces risk, creates capacity, or advances company strategy.	Governance as an accelerator Clear intake, prioritization, ownership, and executive visibility help teams focus and deliver with confidence.	Continuity through modernization The strongest transformation programs improve the future without losing control of the operations supporting the business today.
